

Dear DPV/DSF2 Licensee:

Due to an undetected system problem during our file build process, the May product was corrupted. We are creating a replacement May product and will be distributing it to the licensees in the next few days. In the meantime, please continue to use the April product.

If you have already loaded the May product, you will find some "no matches" on the DPV for the secondary information not being valid.

We apologize for the inconvenience this causes you. Please be assured that we are doing everything we can to ensure that this does not happen again.

We will keep you informed of the progress of the file build.
